PROFESSIONAL SUMMARY

Computer Science Engineering student seeking to transition academic knowledge into practical industry experience. Proficient in foundational technologies including C, C++, Java, Python, and DBMS, with an interest in full-stack JavaScript development. I am an enthusiastic, quick learner who values open communication and teamwork when solving complex challenges. I am looking forward to joining a collaborative engineering team where I can apply my foundational skills and develop my capabilities.

SKILLS

Programming Languages: Python, C, C++, JAVA, SQL

Web Development: HTML, CSS, JavaScript, React.js, Node.js, Express.js, Streamlit

Databases: MongoDB, MySQL, Oracle

AI/ML Frameworks & Libraries: NumPy, Pandas, Scikit-learn, Matplotlib

Tools: Git, MATLAB, Postman

PROJECTS

Universal Decentralized Agentic Federated Learning Platform

Programming Language: Python, solidity(blockchain)

- Engineered a secure decentralized federated learning platform using PyTorch and blockchain with privacy protection, smart contract coordination, and real-time health monitoring

Cricket Fantasy Web Application

Programming Language: React.js(frontend), Express.js(backend), MongoDB(Database), Node.js

- Developed a Full Stack cricket fantasy web application that enables users to create virtual cricket teams, select players, track match performances. The platform simulates the fantasy sports experience based on real or simulated match data

INCOIS: Ocean Hazard Reporting App

Programming Language: JavaScript, Node.js, Python, DBMS, HTML/CSS, API/Data Integration

- Built an Ocean Hazard Reporting Platform for SIH to support real-time monitoring and disaster response. Implemented secure role-based access for regional authorities and users. Processed environmental data streams to deliver AI-powered hazard alerts.

CERTIFICATIONS

- NPTEL Certificate in Python in Data Science with 83%
- Hackerrank SQL (Intermediate) Certificate
- Workshop on Cloud IoT Based Smart Community

INTERNSHIP

Giggso India Private Limited AIML Intern

jun 2025 – jul 2025

- During my internship at Giggso, I engineered cloud-based AI/ML evaluation systems by researching and benchmarking text generation metrics across Azure AI, and the RAGAS library. I also built a custom Grammar Evaluator LLM using Azure APIs and successfully deployed machine learning models into the Trinity UAT platform for rigorous performance validation.

EDUCATION

Anna University, MIT Campus

B.E Computer Science and Engineering

CGPA: 8.6/10

Aug 2023 – Present

M.L.M.Mamallan Metric Higher Secondary School

Higher Secondary – Class XII

Result: 97.2%

Kanchipuram

Jun 2021 – Apr 2023

Chennai
